How to use

Qanday ishlatiladi

Student's Book → darsda · Workbook → uyda

📅 Har darsdan keyin

1️⃣ Darsda	Student's Book'dagi Unit o'tiladi.
2️⃣ Uyda	Workbook'dagi shu Unitning **2 sahifasi** bajariladi (25–35 daqiqa).
3️⃣ Keyingi dars	O'qituvchi 5 daqiqada tekshiradi, ball qo'yadi va imzo chekadi.

🧩 Har Unitda 7 bo'lim

1 Vocabulary	Unit so'zlari — yozish va gapda ishlatish
2 Grammar	Darsdagi qoida — boshqa mashq turlarida
3 Review	Oldingi Unitlar so'zlari — takror
4 Reading	Yangi qisqa matn
5 Listening 🎧	**Workbook Audio** — Track raqami Unit raqami bilan bir xil
6 Writing	Qisqa yozma ish
7 Speaking 🎤	Javobni **ovozli xabar** qilib guruhga yuboring (30–60 soniya)

⭐ Qoidalar

✅ Har vazifani **o'zingiz** bajaring — javoblarni ko'chirmang.
✅ Bilmagan so'zni Student's Book'dagi **Vocabulary** sahifasidan qarang.
✅ Audio'ni **2 marta** tinglang.
✅ Ballaringizni **My Progress** jadvaliga yozib boring.

F Read and write T (True), F (False) or NG (Not Given). — *T — to'g'ri, F — noto'g'ri, NG — matnda aytilmagan*

The Finnish Puzzle

For two decades, Finland has been held up as a model of educational success. Not only do Finnish students perform well in international assessments, but they also spend fewer hours in class than most of their European peers. Formal schooling does not begin until the age of seven, and standardised tests are almost entirely absent until the end of secondary school. Critics, however, warn against simply copying the system. Finland is a small, wealthy and relatively equal society, and its teachers are drawn from the top ten percent of graduates. Rarely is the prestige of teaching so high elsewhere. Moreover, Finland's own results have declined since 2012, prompting a national debate about whether its celebrated reforms still work.

1. Finnish students spend more hours in class than other Europeans. _____
2. Formal schooling starts at seven. _____
3. Finnish teachers are well paid compared to doctors. _____
4. Finland's results have fallen since 2012. _____
5. The writer believes other countries should copy Finland exactly. _____

5 Listening · Tinglash

G 🎧 Workbook Track 1. Listen to part of a panel discussion on education. Complete with ONE or TWO words or a number. — *ta'lim haqidagi muhokamani tinglang*

1. The speaker argues that exams encourage _____.
2. In her region, about _____ % of girls leave school early.
3. The main reason is a lack of _____ near villages.
4. She proposes more _____ courses for teenagers.
5. Teacher salaries should be linked to _____, not to exam results.

6 Writing · Yozish

H Essay (Task 2): Standardised tests are the fairest way to assess students. To what extent do you agree? Write 180–200 words. — *esse yozing (180–200 so'z)*

4 Reading · O'qish

F Read and write T (True), F (False) or NG (Not Given). *— T — to'g'ri, F — noto'g'ri, NG — matnda aytilmagan*

The Accidental Discovery

In 1928, Alexander Fleming returned from holiday to find that mould had grown on one of his bacteria samples. Had he cleaned his laboratory before leaving, the most important medical breakthrough of the century might never have happened. Around the mould, the bacteria had died. Fleming published his findings, but for over a decade few scientists took them seriously, and producing the substance in large quantities proved extremely difficult. It was only during the Second World War, when funding suddenly became available, that a team at Oxford turned penicillin into a usable drug. Were it not for their persistence, Fleming's observation might have remained a footnote. Today, ironically, scientists warn that antibiotic resistance threatens to undo this achievement.

1. Fleming discovered the mould after a holiday. _____
2. Fleming's findings were immediately accepted. _____
3. A team at Oxford developed penicillin into a drug. _____
4. Fleming won the Nobel Prize alone. _____
5. Antibiotic resistance is now a concern. _____

5 Listening · Tinglash

4 Reading · O'qish

F Read and write T (True), F (False) or NG (Not Given). *— T — to'g'ri, F — noto'g'ri, NG — matnda aytilmagan*

The New Silk Road

For centuries, cities such as Samarkand and Bukhara grew wealthy as stops on the Silk Road, where goods, ideas and religions travelled between China and Europe. Today, a new version of this network is being built. Railways, highways and pipelines now link Central Asia to global markets, attracting billions in foreign investment. What supporters emphasise is the creation of jobs and the transfer of technology. Critics, however, point to the risk of debt: several countries have borrowed heavily to finance infrastructure. It is not only economics that is at stake, but also local identity, as foreign products and cultural influences arrive faster than ever. Whether the new Silk Road will bring the prosperity of the old one remains to be seen.

1. Samarkand and Bukhara were stops on the Silk Road. _____
2. The new network includes railways and pipelines. _____
3. Critics are worried about debt. _____
4. All Central Asian countries have avoided borrowing. _____
5. The writer is sure the new Silk Road will succeed. _____

Copenhagen: Bikes Before Cars

In the 1970s, Copenhagen was a city dominated by cars, its streets congested and polluted. Having experienced an oil crisis, city planners decided to change direction. Over four decades, they built hundreds of kilometres of cycle lanes, many separated from traffic by kerbs. Today, more than sixty percent of residents commute by bike, even in winter. The benefits are measurable: air quality has improved, and health costs have fallen. Critics note that Copenhagen is flat and compact, making its model hard to copy in sprawling cities like Los Angeles or hilly ones like Lisbon. Nevertheless, inspired by its success, cities from Paris to Bogotá have introduced ambitious cycling programmes.

1. Copenhagen had heavy traffic in the 1970s. _____
2. An oil crisis encouraged change. _____
3. Most residents now commute by car. _____
4. Copenhagen's cycling model is easy to copy everywhere. _____
5. Paris has introduced a cycling programme. _____

F Read and write T (True), F (False) or NG (Not Given). *— T — to'g'ri, F — noto'g'ri, NG — matnda aytilmagan*

Doctors on Screen

The introduction of telemedicine has transformed healthcare access in rural Uzbekistan. Before its expansion, the nearest specialist for many villages was over a hundred kilometres away, and a single consultation could mean a day's journey and lost income. Now, a nurse in a local clinic can connect a patient with a cardiologist in Tashkent within minutes. The reduction in travel time has been significant, and early diagnosis of chronic diseases such as diabetes has improved. However, the system has limitations. A lack of reliable internet in mountainous areas remains a barrier, and some elderly patients express distrust of consultations conducted through a screen. Furthermore, a physical examination cannot always be replaced.

1. Specialists used to be far from many villages. _____
2. Telemedicine consultations take several days to arrange. _____
3. Early diagnosis of diabetes has improved. _____
4. All mountainous areas have reliable internet. _____
5. Some elderly patients do not trust video consultations. _____

5 Listening · Tinglash

G 🎧 Workbook Track 5. Listen to part of a lecture on public health. Complete with ONE or TWO words or a number. *— jamoat salomatligi bo'yicha ma'ruza*

1. Spending on prevention saves about _____ dollars for every dollar spent.
2. The main cause of death worldwide is _____ disease.
3. The lecturer criticises the overprescription of _____.
4. Screening programmes reduced deaths by _____ %.
5. She calls for greater investment in mental _____.

6 Writing · Yozish

H Essay (Task 2): Prevention is more important than treatment. Discuss (180–200 words). Use at least four nominalisations. *— esse yozing*

7 Speaking · Gapirish

I 🎤 Speaking at home. Answer the questions. Record a voice message (30–60 seconds) and send it to your group. *— savollarga javob bering, ovozli xabar yozib guruhga yuboring*

1. **Part 1:** How often do you visit a doctor?
2. **Part 2:** Describe a time when you or someone you know received good medical care.
3. **Part 3:** Should healthcare be completely free? What are the consequences?

F Read and write T (True), F (False) or NG (Not Given). *— T — to'g'ri, F — noto'g'ri, NG — matnda aytilmagan*

Sun and Water

Uzbekistan appears to be well positioned for an energy transition: it receives over 300 sunny days a year, and large areas of desert are suitable for solar farms. Since 2020, several international companies have invested in solar and wind projects, and the share of renewables in electricity generation is expected to rise significantly. However, the transition faces considerable challenges. The country's electricity grid is ageing, and blackouts during cold winters suggest that energy storage remains insufficient. Additionally, subsidies have kept prices low, which tends to discourage efficient consumption. Water presents a further dilemma: hydropower depends on rivers that are also vital for irrigation, and as droughts become more frequent, these demands may increasingly conflict.

1. Uzbekistan has over 300 sunny days a year. _____
2. International companies have invested in renewables. _____
3. The electricity grid is completely modern. _____
4. Low prices encourage people to save energy. _____
5. Hydropower and irrigation may compete for water. _____

5 Listening · Tinglash

G 🎧 Workbook Track 6. Listen to an energy analyst. Complete with ONE or TWO words or a number. *— energetika tahlilchisini tinglang*

1. Renewables now produce about _____ % of global electricity.
2. The cost of solar power has fallen by _____ % in ten years.
3. The main technical problem is energy _____.
4. Nuclear power seems to be returning in some _____ countries.
5. She suggests that households should install _____.

6 Writing · Yozish

H Essay (Task 2): Should governments remove energy subsidies? Write 180–200 words using hedging language. *— esse yozing*

Who Owns a Painting Made by AI?

In 2022, an image produced with an AI program won first prize in an art competition in the United States, provoking outrage among artists. The creator argued that writing the instructions required skill and creativity; critics countered that the machine had done the actual work. The debate has since intensified. In terms of law, most countries do not grant copyright to works created without significant human input. With regard to ethics, many illustrators point out that AI systems were trained on millions of images without their permission or payment. Owing to these concerns, some galleries have banned AI-generated works, whereas others have opened exhibitions dedicated to them. What remains uncertain is whether audiences value the process behind a work or only the final result.

1. The AI image won a competition in 2022. _____
2. All artists welcomed the result. _____
3. Most countries give full copyright to AI works. _____
4. Illustrators were paid for their images used in training. _____
5. Some galleries have banned AI-generated works. _____

The Price of a Headline

In 2011, a major British tabloid closed after it emerged that its journalists had illegally accessed the phone messages of celebrities, politicians and even crime victims. The newspaper was said to have sold millions of copies thanks to stories obtained in this way. The scandal led to a public inquiry, which examined the culture and ethics of the British press. Supporters of strict regulation argued that self-regulation had clearly failed. Opponents warned that government control over journalism would threaten freedom of the press, which is considered essential to holding the powerful to account. More than a decade later, the balance between accountability and press freedom remains disputed, especially in the age of clickbait and citizen journalism.

1. The tabloid closed in 2011. _____
2. Its journalists accessed phone messages illegally. _____
3. Only celebrities were affected. _____
4. Everyone agreed that the government should control the press. _____
5. The debate is still continuing. _____
